ReactJS Practical Test UpforceTech - Stepper Form

Please convert the given stepper form design using Bootstrap or Material UI with React, it should be responsive for mobiles and tablets.

Please take care of the following points

1) Form has 3 steps.
2) Validate each field based on commonly used rules.
3) In the last step you have to list down all the inserted data.`

Font: Poppins but you can use any
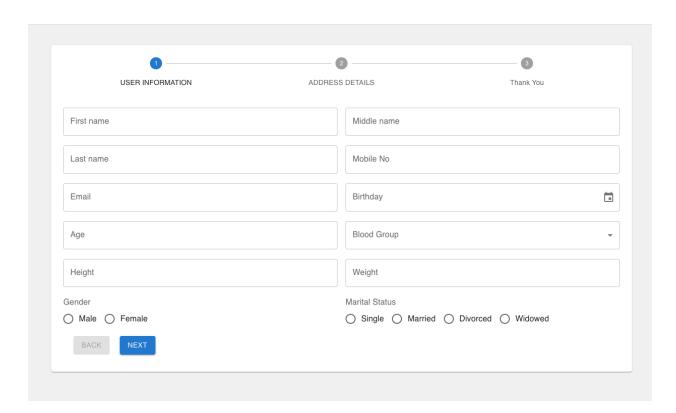

Must Have:

 - The application must be a single-page application (SPA)
 - The application must be divided into components
 - The file structure must be consistent and easy to follow
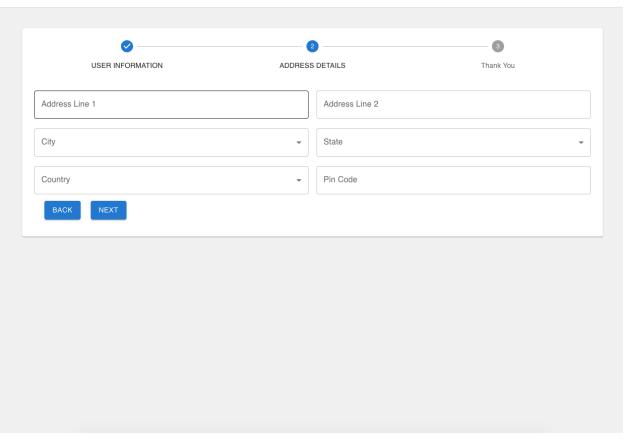

Negative Points:

 - No componentization
 - Inline styles
 - Bad naming
 - Direct DOM manipulation

After completing the task:

1. Share the zip file or git, or (If you share a zip, please name the file as your FirstName_LastName.zip)
2. Deploy the build on Netlify, Heroku or somewhere else and share the URL.
